In/Outdoors

KALASNIKOV 2012

* AUTOMAGIC FLOWERING

The Kalasnikov 2012 Automagicflowering is the autoflowering variant of one of the most powerful strains ever. Keep in mind when choosing a location and your grow-equipment that this strain gives of a strong pungent odor. The Kalasnikov 2012 Automagicflowering is one of the most potent autoflowering strains currently available on the market and under the right conditions also has the potential to produce drastically higher yields than your average other autoflowering strain.

Genetics: Sativa, Indica, Ruderalis

Effect: Strong, mellow

THC: \pm 20%

Height: 50 - 70 cm

Flower: 8 weeks

Yield: 30 - 50 gr/plant

In/Outdoors

LOWRYDER

* AUTOMAGIC FLOWERING

Lowryder was developed for extreme rapid growth with a life cycle from seed to bud of about 8 weeks. Both literally and figuratively this strain fits its name, uniquely short height, and amazingly versatile. Lowryder is stable and reliable. Passing directly from the seedling to the flowering stage, Lowryder altogether does away with the vegetative growth stage. As a result, it is the quickest, most compact, and most discrete plant available. Lowryder's appearance, taste, and high, have nothing to envy of the finer weed varieties, an excellent strain with high potency and good resin production.

Genetics: Indica, Mexican Ruderalis

Effect: Seriously Stoned

THC: 12 - 16%

Height: 20 - 50 cm

Flower: 9 weeks

Yield: Up to 45 gr/plant

In/Outdoors

NORTHERNLIGHT

* AUTOMAGIC FLOWERING

Northernlight automagicflowering feminized seeds have been a favorite to many cannabis growers for years because of their easy growing characteristics and great narcotic values. This strain is highly recommended for beginning growers as it is one of the most forgiving strains around. Northernlight automagicflowering feminized seeds pass directly from the seedling to the flowering stage, it completely skips the vegetative growth stage, in a process called autoflowering. In other words, when planted, it sprouts, grows a couple sets of leaves, then immediately and automatically begins flowering. As a result, growing this strain goes fast!

Genetics: Indica, Ruderalis

Effect: Stony high mix

THC: 16 - 20%

Height: 100 - 130 cm

Flower: 7 - 9 weeks

Yield: 30 - 50 gr/plant

In/Outdoors

SUPER SKUNK

* AUTOMAGIC FLOWERING

Super Skunk Auto produces beautiful dense cannabis plants which reach medium height for your average autoflowering strain, a sturdy, deliciously productive cannabis plant that is reasonably easy to grow without any additional grow and bloom nutrition. By introducing the Lowryder autoflower genes an amazing autoflowering strain emerged suitable for indoors, greenhouse, hydro culture and even outdoors in warmer climates. Medicinally she is often used to relieve stress, chronic pain and increase appetite when there is a lack of. She is highly resinous and good for a very strong skunky flavor as well as smell.

Genetics: Indica, Ruderalis

Effect: Allround buzz

THC: 14 - 18%

Height: 40 - 70 cm

Flower: ± 7 weeks

Yield: 30 - 60 gr/plant

In/Outdoors

WHITE DWARF

* AUTOMAGIC FLOWERING

White Dwarf is an autoflowering variety with pervasive scent and sweet flavour. Then using the autoflowering genes of the ruderalis to produce the ultimate in autoflowering dwarfs. You can have these under 24 hours of light with NO need to switch lighting during the photoperiod. White Dwarf blooms in 2 months after showing regardless of photoperiod. Such thing makes it perfect for early crops. The aroma and taste are earthy and musty and the hit is all you could expect from an Indica; dreamy and lethargic and great for unwinding.

Genetics: Indica, Ruderalis

Effect: Psychedelic

THC: 15 - 18%

Height: 80 cm

Flower: 8 weeks

Yield: 300 gr/m²

In/Outdoors

WHITE WIDOW

* AUTOMAGIC FLOWERING

The White Widow Automagic Flowering is the auto flowering variant of the White Widow strain. One of the most potent Ruderalis hybrids around with an amazing fruity smell and taste. The effects she brings about are often used to reduce anxiety, stress and sleep disorders, a perfect strain to be used for some serious relaxation. She's not a super yielder, for an autoflowering strain she produces average yields but the result is absolutely worth it.

Genetics: Indica, Ruderalis, Sativa

Effect: Extreme Stoned

THC: 15 - 20%

Height: 50 - 60 cm

Flower: 8 weeks

Yield: 30 - 50 gr/plant

AMNESIA

★ FEMINIZED

Amnesia is the perfect strain for a really strong, mellow high. The aroma of the bud by itself isn't very overwhelming. The dark and lime green colored buds of Amnesia are seriously compact with lots of hair buried deep inside of them and covered in loads of crystals. The effects of Amnesia kick in after about 10 to 15 minutes into the smoking experience. Amnesia has a short lasting very clear uplifting, social and cerebral effect and is often used for medicinal purposes by people suffering from anxiety, depression, migraines and nausea.

Genetics: Sativa, Indica

Effect: Strong, mellow

THC: ± 20%

Height: 80 - 110 cm

Flower: 12 weeks

Yield: ± 600 gr/m²

Harvest: October

In/Outdoors

BIG BUD

★ FEMINIZED

Big Bud is one of the world's most appreciated strains, an Indica Sativa hybrid with a smooth smoke and durable happy high effect. For medicinal purposes Big Bud is most often used to treat common ailments, lack of appetite, insomnia, anxiety or stress. This medium high plant was developed for maximum yields, it produces massive buds with huge leaves and may require some branch support to keep the plant from giving in to its own weight. Big Bud is best grown hydroponic or indoor but with some luck and the right mild climate you will also get it to work outdoors.

Genetics: Indica, Sativa

Effect: Happy High

THC: 18 - 22%

Height: 110 - 150 cm

Flower: 8 - 9 weeks

Yield: ± 500 gr/m²

Harvest: September

In/Outdoors

BLACK DOMINA

★ FEMINIZED

Dark, delicious and devastating — Black Domina blends the world's finest Indica genetics hybrid whose distinct looks set her apart from the crowd. It was developed for indoor use, and does best in hydroponic gardens, but can be grown outdoors, though this yields inferior product. Medical use is fairly general ease nausea and migraines. A heavy toke, spicy and smoky, with smokers noting that it tastes almost as if there's hashish blended with the bud. However, this is not a bud for casual relief as it produces a "heavy", often overpowering high.

Genetics: 95% Indica

Effect: Euphoric, relax

THC: \pm 15 - 24%

Height: 130 cm

Flower: 9 - 10 weeks

Yield: \pm 430 gr/m²

Harvest: End October

In/Outdoors

BUBBLEDUM

★ FEMINIZED

Bubbledum is known for its characteristic sweet smell, the typical bubbledum taste and for its amazing euphoric high. Bubbledum is a medium tall, skinny plant with only few branches and produces beautiful compact crystal covered buds. Bubbledum has its cultivation roots in Indiana, USA from where the strain genetics moved to New England and then to The Netherlands (Holland) where it took many more generations and fine tuning to finally produce the sweet stable Bubbledum strain we have today. The main medicinal purpose of Bubbledum is relieving people of stress but is also often used by people suffering from anxiety.

Genetics: Indica, Sativa

Effect: Strong, buzzing

THC: 13 - 18%

Height: 120 - 150 cm

Flower: 8 - 10 weeks

Yield: 300 - 450 gr/m²

Harvest: Late October

In/Outdoors

CHEESE

* FEMINIZED

The popular Cheese strain (Indica/Sativa hybrid) has its early cultivation roots in the UK and is especially well known for its overwhelming cheesy / musky aroma and its heavy body stone accompanied with a pleasant, euphoric effect, a very strong taste and smoke with skunky undertones. Cheese is a very bushy plant with rock-hard buds and tight calyx formation. When growing this strain, indoors or outdoors, it is best to give them plenty of space to develop. For medicinal purposes Cheese is an extremely effective pain reliever and works wonders when it comes to anxiety control.

Genetics: Indica, Sativa

Effect: Very strong high

THC: 10 - 14%

Height: 220 - 250 cm

Flower: 8 - 10 weeks

Yield: Up to 650 gr/m²

Harvest: September, October

In/Outdoors

CRITICAL

* FEMINIZED

Critical feminized seeds are a hybrid cross of Big Bud and Skunk which produce an amazingly strong skunky odor and flavour, even when used with tobacco. During the flowering period, she shows all her potential, what looks like a sativa becomes a super-producer that outstrips all other cannabis. She is also a great outdoor producer, flowering fast and ripening completely by the end of September. Being a great yielder, Critical has become one of the heaviest marijuana for commercial and personal use.

Genetics: Indica, Sativa

Effect: Strong high

THC: 12 - 16%

Height: Up to 200 cm

Flower: 7 - 8 weeks

Yield: 650 - 750 gr/m²

Harvest: End September

In/Outdoors

EARLY SKUNK

★ FEMINIZED

An excellent hybrid between Skunk #1 and Early Pearl. The Early Skunk finishes about 2 weeks earlier than Skunk #1 due to the influence of the Early Pearl. The influence of the latter is also noticeable in the smell and the high: sweet and smooth. On top of that, the strain combines a good yield with mould resistance. In short, Early Skunk marijuana is simply amazing. Early Skunk gives you a powerful Skunk stone, carrying it to new and interesting places.

Genetics: Indica, Sativa

Effect: Middle high to high

THC: 8 - 15%

Height: 200 - 300 cm

Flower: 7 weeks

Yield: 200 - 400 gr/m²

Harvest: September, October

In/Outdoors

GREAT WHITE SHARK

★ FEMINIZED

Great White Shark is a strain that is voted by many as one of the best hybrid strains ever. This strain offers a somewhat unique appearance, a light green coloring and a nice milk like coating of crystals covering the entire nug. When you smoke it, it will quickly take over your mind and make you feel heavy of body. Time seems to stop and sleep will come soon enough. She infiltrates you to the core and takes away your pain, then your consciousness. Explorer her with caution until you understand her potency.

Genetics: Sativa dominant

Effect: Long lasting high

THC: \pm 15%

Height: 360 - 480 cm

Flower: 8 - 10 weeks

Yield: 600 - 900 gr/m²

Harvest: End of September

In/Outdoors

ICE

* FEMINIZED

Ice is an Indica-Sativa hybrid with a very heavy yield. Indoors, this cannabis variety works well in both hydro and soil systems. Ice can also be grown outdoors in regions with a Mediterranean climate. Harvest time starts at around late October. Many growers would prefer this strain because of its few branches but dense flowering capacity. It has 25%THC, making it highly potent and highly recommended for patients undergoing pain management. It can also be used for sleeping and eating disorders.

Genetics: Indica, Sativa

Effect: Strong

THC: \pm 25%

Height: 50 - 100 cm

Flower: 6 - 7 weeks

Yield: 500 - 600 gr/m²

Harvest: Late October

In/Outdoors

JACK HERRER

★ FEMINIZED

The Jack Herrer is a sativa dominant strain, a cross between Skunk #1, Northern Lights #5 and Haze. Jack Herrer is very popular and a marijuana strain known for its amazing medicinal qualities. The Jack Herrer strain has a light green color with light orange to brown hairs covering it. Amazing quality medical cannabis producing dense, easy to work with buds. Taste and smell are skunky, sharp musky and spicy. It gives you a light headed almost euphoric feeling which can be felt almost instantly. Jack Herrer is considered to be among the world's finest.

Genetics: Indica, Sativa

Effect: Durable up high

THC: ± 20%

Height: 150 - 180 cm

Flower: 8 - 9 weeks

Yield: ± 500 gr/m²

Harvest: September, October

In/Outdoors

KALASNIKOV 2012

★ FEMINIZED

The Kalasnikov 2012 is a power packed, resinous plant and carries compact buds that bristle with hairs and glistening trichomes. This plant has a smooth smoke and a high THC level. Kalasnikov 2012 feminized seeds are generally grown indoors, green housed, or hydroponic, this doesn't mean it is not suitable for outdoors, the strain does great outside in mild climates. This strain very suitable for medicinal purposes by people suffering from chronic pain, nausea, depression, insomnia, headaches, PMS, and arthritis.

Genetics: Indica, Sativa

Effect: Strong, mellow

THC: ± 20%

Height: 50 - 70 cm

Flower: 12 weeks

Yield: ± 450 gr/m²

Harvest: Mid October

In/Outdoors

MARLEY COLLIE

★ FEMINIZED

The word 'collie' in Jamaica means marijuana. Bob Marley as we all know is a famous Reggae singer from that country as well. Marley's Collie is capable of growing both indoors and outdoors. This strain is ideal for sea of green growing due to its huge central bud and light branching. The buds itself a very rich in resin and has a lot of hair. Marley's Collie has a sweet aroma with some musky undertones owing to its Afghan lineage. The effect it gives when smoked is relaxing buzz than is good for peaceful moods.

Genetics: Indica, Sativa

Effect: Relaxing buzz

THC: ± 18%

Height: 130 - 160 cm

Flower: 8 - 9 weeks

Yield: Up to 750 gr/m²

Harvest: End October

In/Outdoors

MATARO BLUE

* FEMINIZED

Mataro Blue is easy to manage, fast flowering and massive yields, what more could a grower ask for! Mataro Blue is, indeed, one of those few marijuana strains which stand out in the international cannabis market. The content of THC is high as 24%! Rarely seen in an Indica. Mataro Blue Feminized is an Indica dominant THC bomb of a plant. It truly is a wonderful strain; easy to grow in a range of environments, fast to flower and extremely powerful in effect. It doesn't need a lot of care, it tolerates high temperatures.

Genetics: Indica, Sativa

Effect: Extremely powerful

THC: \pm 24%

Height: 60 - 100 cm

Flower: 7 - 8 weeks

Yield: 600 gr/m²

Harvest: September

In/Outdoors

NEVILLE HAZE

★ FEMINIZED

Neville Haze was named after the breeder who began this strain. It is a tall sativa and is almost pure Haze. Neville Haze has fluffy buds, a very long flowering period and delivers an intense rushing high. Neville Haze marijuana has a complex aroma that almost smells like a plant other than a cannabis. The result is a tall, thick-budding plant with a truly out-of-this-world high. This is not one for the casual smoker! Neville Haze has a strong psycho-active high effects.

Genetics: Sativa, Indica

Effect: Extremely powerful

THC: ± 20%

Height: 120 - 150 cm

Flower: 14 - 16 weeks

Yield: 700 gr/m²

Harvest: December

In/Outdoors

NORTHERNLIGHT

* FEMINIZED

Northernlight feminized seeds have been a favorite to many cannabis growers for years because of their easy growing characteristics and great narcotic values. This strain is highly recommended for beginning growers as it is one of the most forgiving strains around. Northernlight feminized is a good choice for those who are looking for a heavy, lethargic stoned effect. The smoke is full bodied yet somewhat neutral in flavour. The taste is pungent with a sweet after taste. As a typical Indica the effect is strong, producing a high level of relaxation for the body and the mind.

Genetics: Indica, Sativa

Effect: Stoned high mix

THC: 16 - 20%

Height: 100 - 130 cm

Flower: 7 - 8 weeks

Yield: ± 400 gr/m²

Harvest: September

In/Outdoors

NY-DIESEL

* FEMINIZED

As the name suggests it has its roots in New York City, NY Diesel is an Sativa dominant hybrid (60% Sativa and 40% Indica) strain with quite an amount of strains thrown in the parental mix , too many to get into right now. The plant produces heavily crystal covered buds with a relatively low density. It has a sweet fruity smell and taste. NY Diesel will give you a complete high, an uplifting cerebral sativa feeling combined with mellow body stone. For medicinal purposes NY Diesel is mainly used to treat chronic pain and nausea.

Genetics: Sativa, Indica

Effect: Light, mellow

THC: 15 - 20%

Height: Up to 300 cm

Flower: 9 weeks

Yield: Up to 500 gr/m²

Harvest: Mid October

In/Outdoors

POWER PLANT

* FEMINIZED

Power Plant is a strong mostly sativa variety developed from South African strains. Power Plant has a pleasant, almost pine, after taste and a powerful social buzz. It can develop outdoors and begins her flowering period late. When taken care of well, Power Plant can produce enormous yields. Power Plant is one of the very consistent plants that produce exceptional clones. When you smoke this marijuana plant, the effect is very smooth and non choky. This pot is soft and mellow in taste and smell although in terms of uplifting mind high, it's very mighty powerful.

Genetics: Sativa, Indica

Effect: Uplifting mind high

THC: 15 - 20%

Height: 70 - 100 cm

Flower: 8 - 9 weeks

Yield: ± 500 gr/m²

Harvest: October

In/Outdoors

RUSSIAN SNOW

★ FEMINIZED

Russian Snow is a combination of the power packed AK-49 and the legendary White Widow resulting in an amazing frosty cannabis plant with an enjoyable sweet aroma and a powerful clear and durable high. Being Indica dominant she reaches medium height with a compact stature and produces very resinous flower tops. Russian Snow is an easy to grow strain suitable for indoor as well as outdoor growing. The plant doesn't carry many leaves making it perfect for indoor growing.

Genetics: 90% Indica, 10% Sativa

Effect: Strong high

THC: ± 18%

Height: 80 - 120 cm

Flower: 8 - 9 weeks

Yield: ± 450 gr/m²

Harvest: October

In/Outdoors

SHIVA SKUNK

★ FEMINIZED

Shiva Skunk is the most powerful of the Skunk family and one of the most potent Indica-dominant species that have ever been. Most indoor methods will give pleasing results, including a sea of green style garden. Very reliable and stable, this strain is hardly skunk and very Northern Lights in appearance. Your plants will not stretch very much but stay short with dense, super resinous Indica flowers. Delivering a sweet, fragrant smoke, Shiva Skunk will yield sweet, spicy buds that give a psychedelically stoney buzz.

Genetics: Indica dominant

Effect: Stoned and high

THC: $\pm 15\%$

Height: 100 - 120 cm

Flower: 6 - 8 weeks

Yield: $\pm 450 \text{ gr/m}^2$

Harvest: October

In/Outdoors

SILVER HAZE

* FEMINIZED

Silver Haze is a true Indica-Sativa hybrid. Haze, a strong pure Sativa, crossed with the high-potency Indica strains Northern Lights and Skunk, Indica dominance has been reduced by back-breeding the strain. The Indica influence keeps Silver Haze short in height and at the same time increasing the size and density of its buds while maintaining an intense cerebral and giggly Sativa high. Silver Haze has an amazing strong spicy smell combined with a pine Haze, fruity aroma and full-bodied Haze flavor.

Genetics: Sativa, Indica

Effect: Uplifting high

THC: 16 - 20%

Height: 70 - 100 cm

Flower: 9 - 10 weeks

Yield: ± 450 gr/m²

Harvest: Late October

In/Outdoors

SKUNK

* FEMINIZED

This is the strain that changed cannabis cultivation. The potency of this branch of the cannabis family tree is so notorious that 'skunk' is often used as a term for any powerful ganja. Skunk #1's energetic performance and bountiful yields demonstrate the true meaning of hybrid vigour. Growth and flowering are mostly-Indica in appearance, though Skunk plants gain more height than pure Indicas when blooming. The extra-dark green of this strain's foliage comes from her Afghan ancestors. It is easy to manicure due to its high bud-to-leaf ratio. It has a sweet smell and taste with a cerebral high.

Genetics: Indica, Sativa

Effect: Stoned and high

THC: 14 - 26%

Height: 120 - 150 cm

Flower: 7 - 8 weeks

Yield: \pm 600 gr/m²

Harvest: October

In/Outdoors

STRAWBERRY COUGH

★ FEMINIZED

Strawberry Cough is a sweet-flavored indoor variety. The creamy berry taste combines with its expansive smoke to deliver a variety worthy of its name. The Strawberry Cough is very productive plant of high value as a medicinal herb. The effects are euphoric, anti-anxiety high, this mostly sativa produces a comfortable and enjoyable, yet powerful, experience. Strawberry Cough's smoke is sweet and fruity with a strawberry/kiwi flavor. The buzz is an active, energizing one, which makes it excellent for use as an anti-depressant.

Genetics: Sativa, Indica

Effect: Cerebral high

THC: ± 12%

Height: 120 - 150 cm

Flower: 9 weeks

Yield: ± 600 gr/m²

Harvest: Mid-late October

In/Outdoors

SUPER SKUNK

* FEMINIZED

Super Skunk is a Skunk #1 cross with an Afghani cannabis and is famous for her super-vigorous, super-potent, and super-fragrant reputation. Super Skunk is also extremely easy to grow and has a dependable all-round performance which makes it the ideal strain for beginning growers to start with. She is highly resinous and good for a very strong skunk flavor and smell. Super Skunk produces a seriously pleasant high.

Genetics: Indica, Sativa

Effect: Allround buzz

THC: \pm 14 - 18%

Height: 100 - 120 cm

Flower: \pm 7 weeks

Yield: \pm 600 gr/m²

Harvest: October

In/Outdoors

WHITE WIDOW

* FEMINIZED

White Widow is a strain of cannabis known for its abundance of white trichomes and high potency. White Widow has an amazing relaxing effect. It, like most Indica marijuana strains, is a good appetite enhancer. However, being a cross between Sativa and Indica it also has the mood enhancing qualities of sativa. White Widow stimulates interest in activities you would otherwise care less about.

Genetics: Indica, Sativa

Effect: Extreme stoned

THC: 15 - 20%

Height: 80 - 120 cm

Flower: 8 - 9 weeks

Yield: \pm 450 gr/m²

Harvest: Late October

In/Outdoors
